

ANDREW RICHARDSON

Senior Software Engineer

+1(615) 424-6893 ◊ andyandy698@gmail.com ◊ [linkedin.com/in/andrew-roland-richardson](https://www.linkedin.com/in/andrew-roland-richardson)

OBJECTIVE

Software Engineer with 6+ years of Full Stack development experience specializing in React, JavaScript, TypeScript, and NodeJS. Proven skill set demonstrated by leading teams of engineers and building and optimizing large-scale customer experiences. Seeking a challenging role to leverage my technical skills and leadership experience.

EDUCATION

Bachelor of Computer Science (Minor in Math), University of Alabama in Huntsville 2016 - 2019

SKILLS

Programming Languages	JavaScript, TypeScript, HTML/CSS, Java
Libraries & Frameworks	ReactJS, NodeJS, CSS, GraphQL
Build & Deployment Tools	Webpack, Yarn Workspaces, Git, GitHub Actions, Bitbucket, AWS, Contentful
Data Science Tools	Databricks, Amplitude, Statsig

EXPERIENCE

Senior Software Engineer March 2025 - Present
Atlassian *Remote*

- Led multiple cross-product growth features that contributed +\$30M to the business's bottom-line.
- Led 0 to 1 TWC cross-flow growth and onboarding funnels adding +\$2M to the business's bottom-line.
- Decreased growth experiment QA time by 25% with the creation of a customizable site provisioning tool.

Staff Software Engineer Jan 2023 - March 2025
Asurion *Remote*

- Led four engineers responsible for Asurion's authenticated dashboard experience for 20+ partners with 250k+ monthly visitors.
- Built My Account v2 with React SSR support, which increased performance by 40% over v1, and improved developer velocity by 80%.
- Led four engineers responsible for Asurion's marketing and tech article websites with 2M+ monthly visitors.
- Optimized build process with Node.js and Webpack and reduced build times by 50%.

Software Engineer Feb 2022 - 2023
Tanium *Remote*

- Led a team of four engineers to create interactive exportable reports based on client dashboards using Typescript, React, Node.js, Webpack, and Go.
- Created interactive standalone HTML documents using Webpack and Node to attach the bundle to the document directly.

Frontend Software Engineer June 2021 - 2022
Postscript *Remote*

- Built a user-facing A/B testing platform to improve new feature adoption experience for customer storefronts.
- Built a React & Storybook component library to reduce development time by 40

Software Engineer Jan 2020 - 2021
Asurion *Remote*

SDE Intern Summer 2019
Amazon *Austin, TX*

PROJECTS

Personal Portfolio. A personal portfolio website showcasing my full-stack development skills and projects, implemented with advanced features such as dynamic content rendering and responsive design. The website was developed with React, TypeScript, Contentful, and AWS. ([See it here](#))
